

Building the future of voice

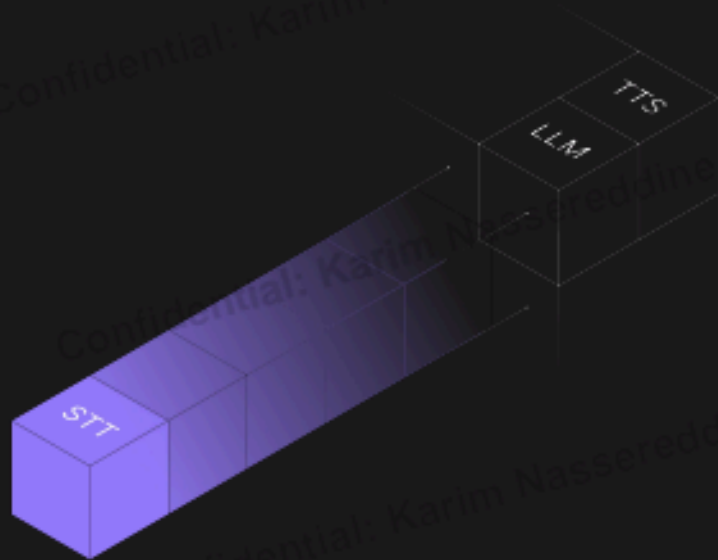

The future is clearly voice-first – but today's speech AI systems are *not* enough

They extract words, process it with LLMs, and generate responses.

We need more intelligent systems to capture the complexity of human conversations.

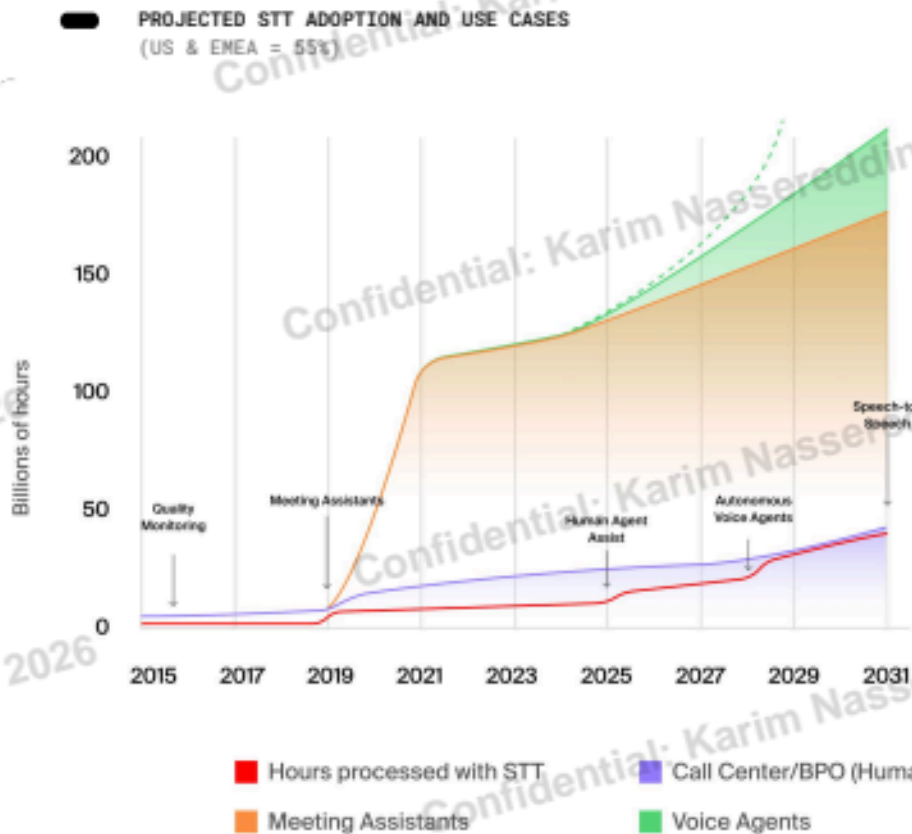

Starting with reliable STT.

From customer calls
to online meetings,
audio is everywhere

Representing a **\$140B market**
and rising, with a **12% CAGR.**

However, with **<5%** processed
with basic STT today, there's a
massive untapped potential

Here's what is
needed to
unlock the STT
goldmine

NON-NEGOTIABLE #1

Performance

PARTIALLY SOLVED

HOW

- ✓ Accuracy
- ⌚ Precision (key data)
- ⌚ Latency
- ⌚ Multilingual support

NON-NEGOTIABLE #2

Infrastructure

NOT SOLVED

HOW

- ✗ Infinite scaling
- ✗ Stable performance
- ✗ Reasonable cost

NON-NEGOTIABLE #3

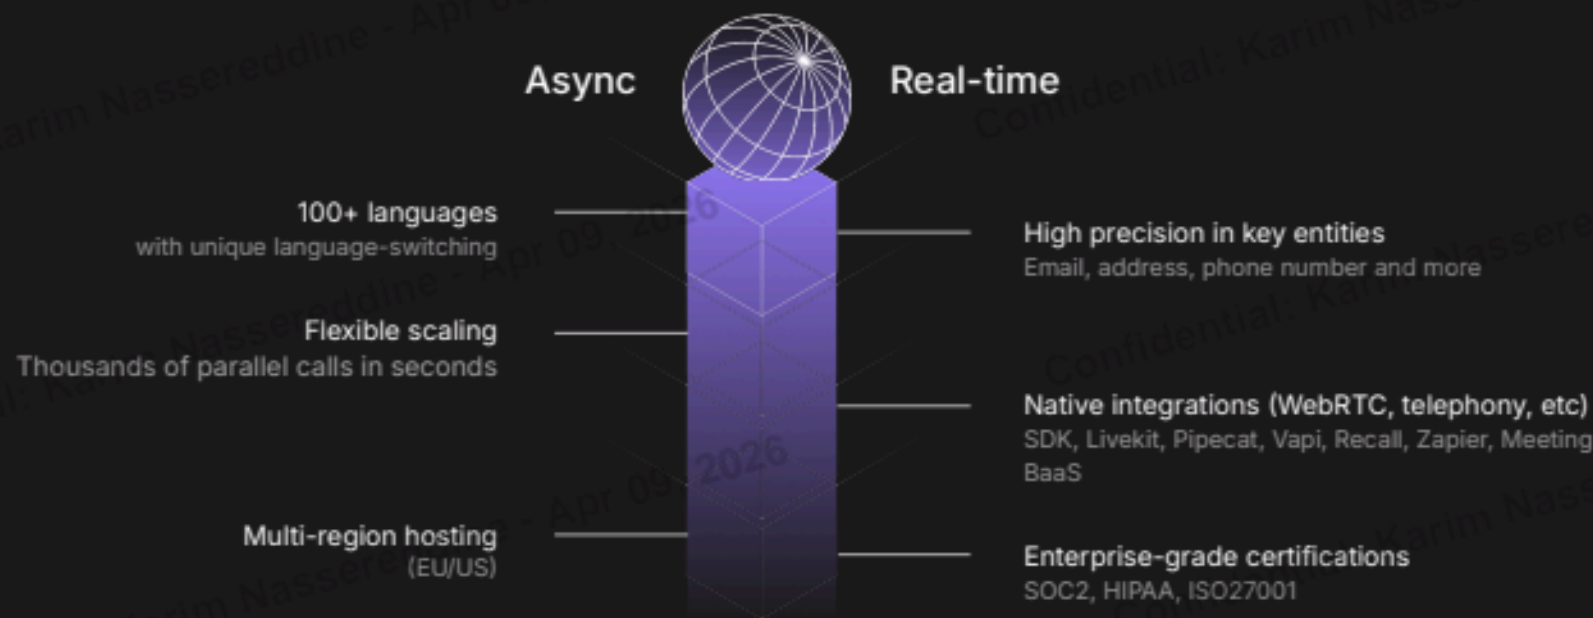

Integration

SOLVED

HOW

- ✓ WebRTC/ Voice Agent frameworks
- ✓ Comms platforms
- ✓ Telephony protocols

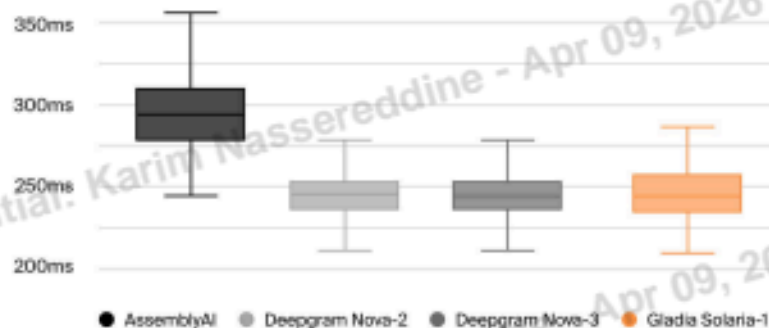

Enter Gladia, the #1 infrastructure in speech recognition today

Our foundation model sets it apart – faster, more accurate and truly multilingual

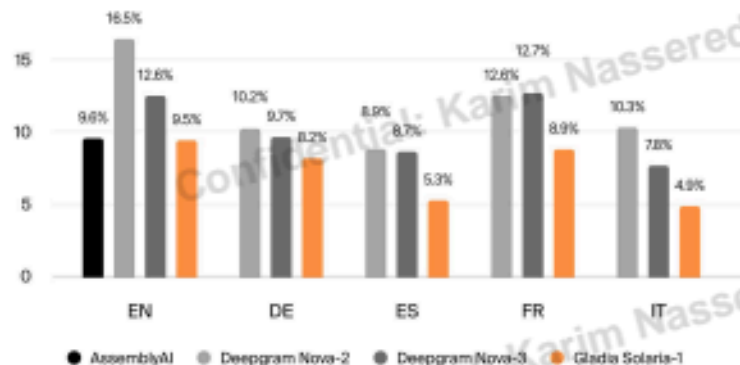

LATENCY (TIME-TO-FIRST-BYTE)

LOWER IS BETTER

ACCURACY (WER)

LOWER IS BETTER

A robust architecture tailored for real-world use cases and scaling needs

"We tried open-source Whisper, but it wasn't the best fit for our needs, and maintaining it added complexity. We needed a solution that offered high accuracy, speed, and ease of integration."

— Farid Issabhai
Staff Engineering

"We considered the open-source route. The reality is that there is a tremendous amount of overhead in terms of being able to deliver transcription at scale, in production, to tens of thousands of users simultaneously. That's where Gladia comes in."

Attention

— Matthias Wickenburg
Co-Founder & CTO

Reaching \$4.5M ARR with 300k users across the world

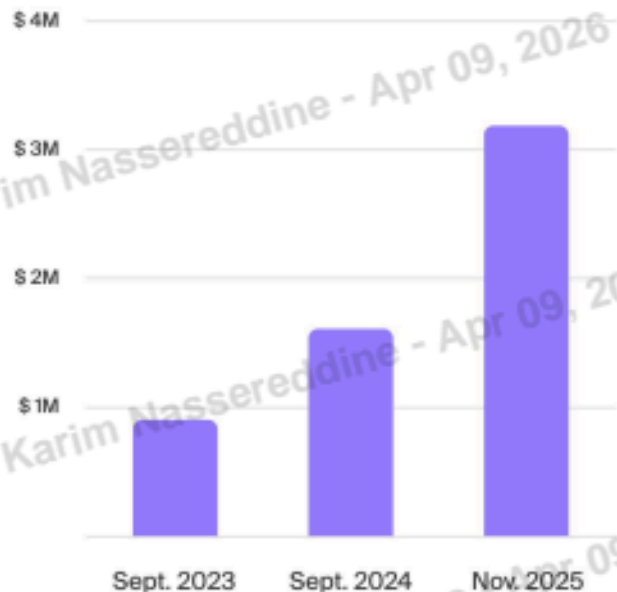

x2+ YoY ARR growth

+2.1k top logos

47% revenue generated in the US

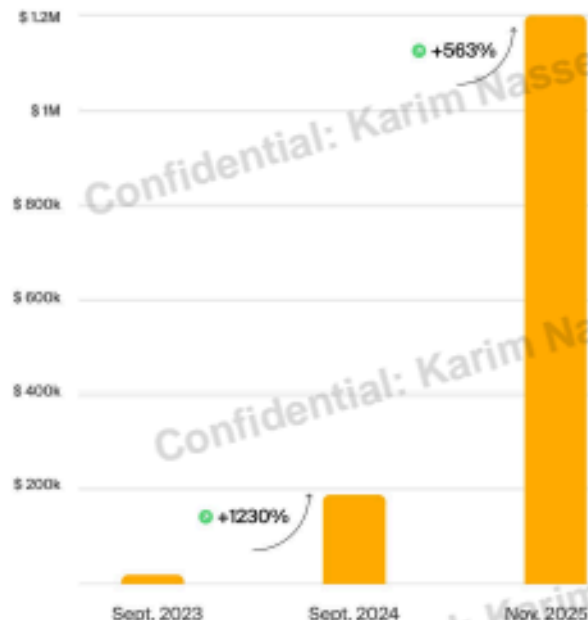

A solid sales-led model fueled by 30% PLG momentum

COMMITTED ARR

95 enterprise subscriptions

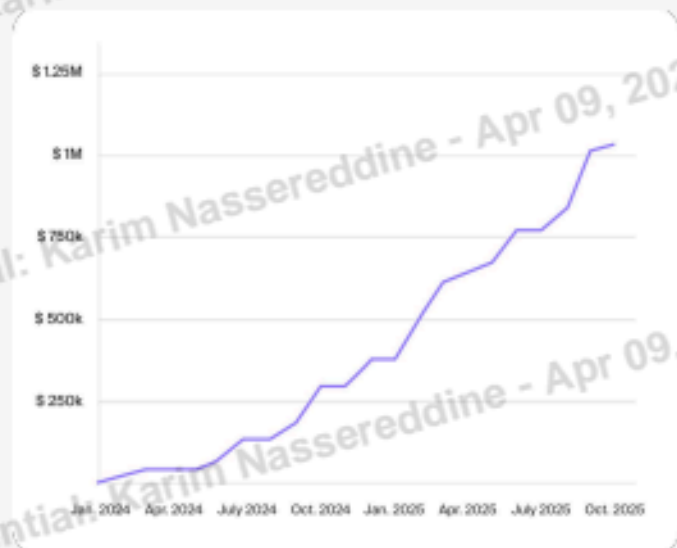

SELF-SERVE ARR

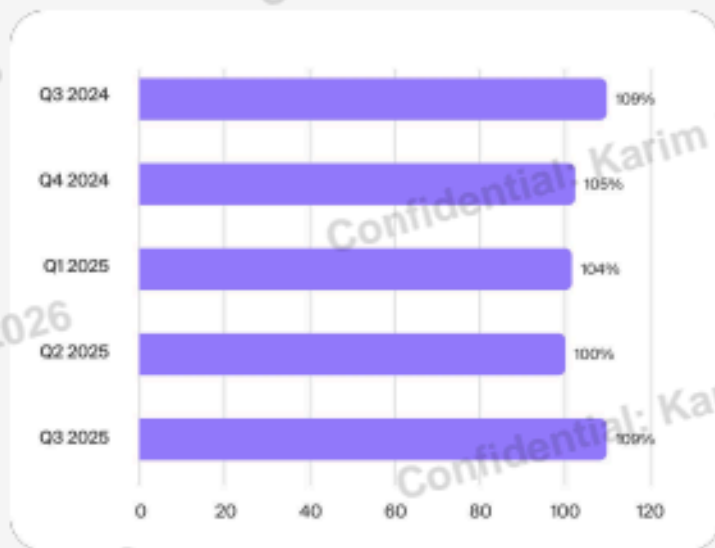

+2,000 self-serve customers

We land, we expand: NDR > 100% across all ICPs

CUMULATED UPSSELLS (SINCE JAN. 24)

NET DOLLAR RETENTION

\$44k

Average upsell amount

6

months

Average upsell time

Meeting Assistants
49% of total upsells

Call Center / BPO
30% of total upsells

Voice Agents
11% of total upsells

Content & Media
10% of total upsells

Today's speech AI systems are *not* enough

In a market that's expanding horizontally, we're going deeper into speech – to unlock richer understanding and contextual awareness.

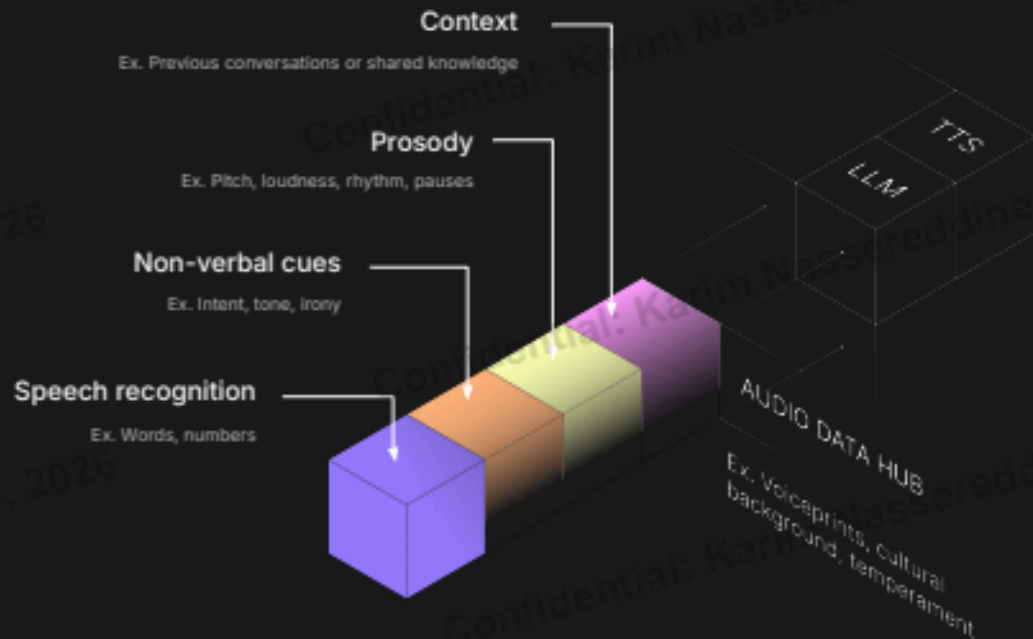

Data beyond words.

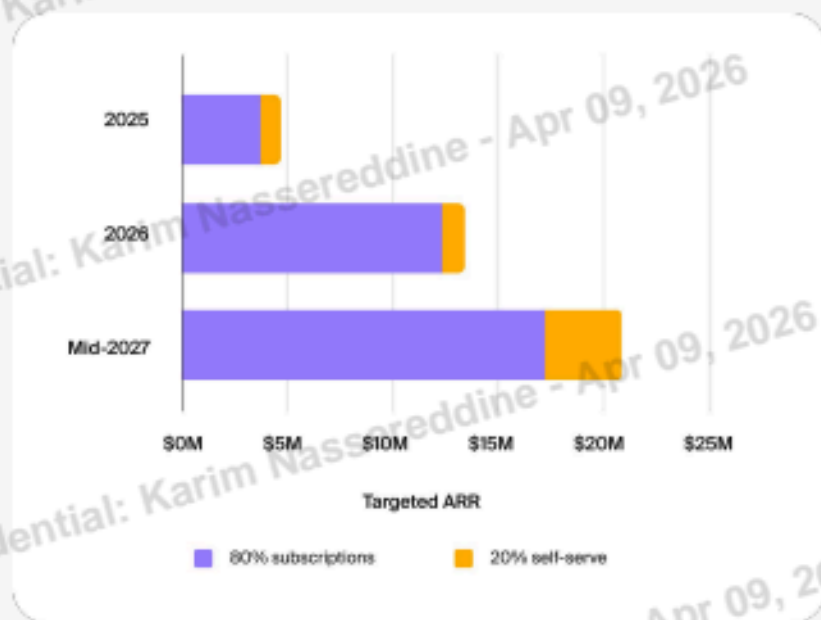

Gladia will become the global audio data hub

Be it in customer support, sales calls, or medical consultations, Gladia's infrastructure will:

- ✓ Capture words with ultimate info fidelity
- ✓ Enrich it with more advanced speech models
- ✓ Store speaker-based audio metadata for full contextual understanding

We are targeting \$20M ARR in the next 18 months

TIER 1

Enterprise | 70 customers

ACV 150K

talkdesk

ICP ▶ Call Center / BPO

VONAGE

GTM ▶ 1:1 ABM, events, partnerships & FDEs

TIER 2

Mid-market | 120 customers

ACV 40K

HappyRobot

ICP ▶ Call Center / Meeting Assistants

Cluely

GTM ▶ 1-to-few segment campaigns, tactical outbound
Technical Integrators

TIER 3

SMBs | 220 customers

ACV 20K

thoughtly

ICP ▶ Meetings Assistants / Voice agents

aquant

GTM ▶ Broad, automated inbound / outbound programs
